

## Exchange 2007 Small Business

WebGlobe's hosted Exchange 2007 service comes with **everything** you need for business email: all hardware and software, fully-managed, plus expert support in Danish and English:

### All hardware and software

With WebGlobe, you do not need to purchase anything except our service. Our engineers install and maintain absolutely everything. We deploy and manage the entire system – and you pay a simple, affordable monthly fee.

### Free Outlook 2007/Entourage

WebGlobe supports both PC (Outlook 2007) and Mac (Microsoft Entourage), with a free copy for all users. In Snow Leopard for Mac we also support iCal, Mail and Address Book directly. We also support all major languages including Danish, English, Spanish, French, German, Russian and more.

### Total Control with HostPilot

HostPilot is unique to WebGlobe. It is the only control panel that lets you manage users, mailboxes, lists, BlackBerry, HTC, iPhones – Windows smartphones and more. Our competitors tried to license it from us (we didn't let them) – instead, they offer only basic, frustrating control panels.

### MyMailboxManager™

MyMailboxManager allows email users to manage certain mailbox settings on their own, so administrators aren't bothered with minor changes.

### Enterprise-grade Infrastructure

WebGlobe has invested millions of dollars in multiple tier-4 datacenters and fully redundant servers, storage and networks. It far outstrips other hosted Exchange companies or basic in-house email solutions.

### **Free Sharepoint included**

SharePoint is an essential add-on for Exchange 2007 and WebGlobe includes it free of charge with all 10 and 25-plans. Securely share documents and files online, with rights management and anywhere-access, 24x7.

### **Premium antivirus and antispam**

WebGlobe includes its premium SpamStopper® antivirus and antispam service for free with all 10 and 25-plans. (Optional add-on for single plans).

### **Expert support in Danish and English**

The world's largest team of Microsoft Gold Certified Exchange experts takes care of your Exchange server and support, 24x7. This includes all maintenance, daily backups and support team access.
